Dear Sir,

I have been employed
at the Bflo Trap & Field Club
for the past 17 years and
this is where I received your
address from some one with the
Aero Club. I told them of my
experiences and they advised
my writing you.

Last September 1st we moved
to the country. It is about 10
miles from Attica - we are on a
secondary road, no street light
about 3 miles or so from the
main road. As of Sept 25th
of last year I've had about
40 sightings and kept a
rough record of such, but
after a while got tired of it.

my 3 daughters have seen,
not down neighbours & also
other neighbours. my brother
~~who is now in~~
Viet Nam was home on leave
& everytime we talked about
it he would decline the means.
However 2 days before he left
he saw with his own eyes
what we were talking about.
As yet I have seen no one, but
it wouldn't surprise me to
come face to face one day.
They are still around. They
are definitely landing nearby.
It is very strange to mind.
One nite Sue & I were coming
home from bowling and saw
a very large bright star -
We watched it for miles -
then it turned colors & I couldn't
believe my eyes - it was a
large ship - the size of a

3:45 pm - It was aimed right
at us. - It was dull gray -
noises a big galloping light in
front & 3 large lights in the rear.
The center was a yellowish
gold color, transparent & a
red flame shot thru the center.
It was like a plane coming in
for a landing & went right
over our heads - I know it
landed, it had to but I see
was driving & wouldn't stop.
When we first moved, out here
2 different shaped objects followed
me home. - bunched right in
the sky along with the car.
She tried in vain to get picture,
It's hard - she have so many
chances - one thing for sure I'm
interested but scared to death.
I shake all over.

I asked ~~the car~~ why I'm
seeing these things so much.

I know damn well it is nothing
of ours - He said either someone
from our area is contacting these
objects or else someone in
our area is from another
planet.

I never really believed this
till we moved to the country
& have seen what I have -
If I could only get pictures
I'd be famous. At least once
a week I see something!
I do have some slides but it's
only a dot. Can't tell too
much - Why doesn't someone
investigate this? In some other
people have reported this!
They could really learn something
if they camped in our back
yard - we have 5 acres.

Sincerely,
~~_____~~
